FOR IMMEDIATE RELEASE

USPraxis Debuts Self-Propelled 24hp Stump Machine

Sycamore, IL (USA) – March 1, 2009 – Expanding on their solid line of professional grade power equipment, USPraxis Inc. will make their introduction of the new PRX240, 24hp Self-Propelled Stump Machine at The Rental Show in Atlanta Georgia on March 2-5, 2009.

USPraxis will start shipping production models of the new PRX240 Stump Machine on May 15, 2009. James Cornelius, President of USPraxis, showcased the new product adding “Customers have been requesting this machine for years but the challenge for us was to build a larger-beefier Stump Machine that was able to utilize our patented Quadrublade® be self propelled and still have that well balanced ergonomic feel we’re known for. And I think we’ve definitely hit the mark here.” Made proudly in their manufacturing facility in Sycamore, Illinois the 24hp Stump Machine is based on the engineering expertise developed over the past decade of manufacturing their successful line of portable stump grinders. Featuring heavy duty commercial grade components this machine was designed specifically with the rental market and tree service professionals in mind.

“USPraxis Announces self-Propelled 24hp Stump Machine” (page 2)

The 24hp Stump Machine is painted with a high quality powder coating for long lasting exterior durability, easily assessable controls, 16” diameter cutter wheel, a manual transmission that allows for advancing forward and reverse and for pivoting the machine without the need to lock a tire, ATV tires allow for an aggressive stance that’s much more forgiving on turf and improves visibility of the cutting shroud. Additional features include an adjustable handle, a 24hp Honda or 25hp Subaru V-Twin engine, and an integrated 2.5 gallon steel gas tank. Another unique feature is the easy Transport Cradle that allows towing of the machine safely down the road. A 2-year warranty, 12-inch DOT rated tires, torsion axle, and a 2-inch hitch are standard features on Transport Cradle. You’ll be amazed at the surprisingly compact size yet incredible performance you’ll see out of this 24hp Stump Machine.
